Daerah Khusus Ibukota Jakarta, Indonesia

<https://balitax.github.io/>

As an iOS Developer with six years of experience, I've honed my skills in Swift across a wide range of projects. My ability to deeply understand client requirements and transform them into high-quality mobile solutions is one of my key strengths. This process involves problem-solving, design thinking, and teamwork. Staying updated with the latest technologies and strategies in iOS development is crucial to my work ethic. My proficiency in the latest development tools and my interest in emerging trends like AI and AR/VR technologies keep me at the forefront of this dynamic field. I believe in clear communication and mutual respect within a team, which I've found to lead to the best results.

Work Experience

iOS Engineer

Bareksa

Jan 2024 - Present

- Collaborated with cross-functional teams to develop new features and maintain app stability, resulting in a [number]% improvement in user experience metrics.
- Developed and implemented new features for Gold, Stocks, Umroh, Mutual Funds, and New Onboarding modules, achieving measurable improvements in user engagement and process efficiency by 20%.
- Created dev-tool for easier development tools
- Migrated hard config to xcconfig
- Created design system for iOS components
- Migrated network service into modern async swift
- Migrated cocoapods into SPM
- Integrated MoEngage Rich Notification Service for Enhance Users

iOS Engineer

Stockbit

Jun 2021 - Nov 2023

- Worked collaboratively across teams, building features and maintaining app stability
- Developed the e-IPO feature to enable investors to purchase shares offered during an initial public offering (IPO).
- Developed an Analyst Rating system to evaluate stocks and identify buy or sell recommendations.
- Kept the login and registration feature operational, ensuring stability and proactively enhancing code quality.

Senior iOS Developer

RoomMe

Jul 2020 - Jun 2021

- Created app to book monthly Boarding room integrated with payment SDK like midtrans, GoPay, ShopeePay, Dana
- Created an application from scratch that is used for boarding house owners to manage their boarding houses
- Designed application architecture to make it easier to collaborate with the team using the MVVM Coordinator pattern
- Worked closely with UI designers and collaborators to create intuitive and responsive user interfaces.

iOS Engineer

SehatQ

Oct 2019 - Jul 2020

- Created e-Commerce feature for the sale of Drugs from Emedika hospital pharmacy.
- Integrated with payment methods for payment of drug orders and doctor consultations
- Engaged in the design and implementation of systems to improve scalability, stability and performance of iOS apps.

Lead Mobile Developer & AVP

Distinction On Technology (DOT Indonesia)

Dec 2015 - Feb 2019

- Developed and created an app with the team and managed the mobile developer team on the project.
- Devised and implemented an innovative development process resulting in faster production rates and efficient allocation of resources
- Evaluated existing and emerging technologies to determine the optimal software engineering solutions for the mobile platform
- Mentored and spearheaded a team of developers in their efforts to optimize code, resulting in improved performance.

Jr iOS Developer

Distinction On Technology (DOT Indonesia)

Jan 2015 - Feb 2018

- Help senior and lead to develop mobile application iOS using current swift version
- Developed native iOS applications for a diverse range of clients
- Optimized existing applications to create a more user-friendly experience
- Used UIKit framework, Core Data, and Cocoa Touch to create iOS applications
- Collaborated with design teams to successfully implement user interface features
- Troubleshoot and resolved reported issues quickly and efficiently.

Education

Universitas Maulana Malik Ibrahim Malang (UIN Malang)

Informatics Engineering

2010 - 2015

Skills

Hard Skills

Swift, Codeigniter Framework, Laravel, Optima, GitHub, Git, Skype, Open Source, App Store release processes, Fastlane, Xcode Cloud, CI/CD

Soft Skills

Productive, Agile Environment, Coaching mindset, Ability to explain trade-offs, Communication, Code reviews
